

HW 3 Grading Guidelines

Total Points: 5

You may not use any special tools to create your pages. Graders will view the source code and verify that you wrote the HTML and CSS directly.

1. **Layout – 2 points:** All components (text, font, borders) were properly placed.
2. **Font style, size, and color – 1 point:** if there is no big difference from the PNG image, you get 1 point for each component.
The grader will load your page(s) using the Firefox browser and set the page to the same size as the PNG image in the assignment's description.
3. **CSS – 1 point:** Layout uses CSS to imitate page as closely as possible, including vertical scrolling and background images.
4. ***home and nature* hyperlinks – 1 point:** anchors must properly refresh the pages.

IMPORTANT

- Using “Frames” and/or “cropped” images (using tools like Photoshop) will result in a 5-point penalty.
- These grading guidelines are provided for your guidance. If any issue is not explicitly covered, you may discuss it on Piazza.
